

OPERATING SYSTEMS (CS304)

OS Lab Viva Prep Cheat Sheet

Frequently Asked Viva Questions

1. What is an Operating System?
2. What are the functions of an Operating System?
3. Define Process.
4. What is a Process Control Block (PCB)?
5. Explain Process States.
6. What is Context Switching?
7. Define Thread.
8. Differentiate Process and Thread.
9. What are User-Level Threads?
10. What are Kernel-Level Threads?
11. What is a System Call?
12. Name different types of System Calls.
13. What is CPU Scheduling?
14. Define FCFS Scheduling.
15. What is SJF Scheduling?
16. What is Round Robin Scheduling?
17. What is Priority Scheduling?
18. What is Turnaround Time?
19. What is Waiting Time?
20. What is Response Time?
21. Define Deadlock.
22. List the four necessary conditions of Deadlock.
23. What is Deadlock Prevention?
24. What is Deadlock Avoidance?
25. Explain Banker's Algorithm.
26. What is a Resource Allocation Graph?
27. What is Memory Management?
28. Define Paging.
29. What is Segmentation?
30. Differentiate Paging and Segmentation.
31. What is Virtual Memory?
32. What is Thrashing?

33. What is a Page Fault?
34. What is Demand Paging?
35. Define File System.
36. What are File Allocation Methods?
37. Explain Contiguous Allocation.
38. Explain Linked Allocation.
39. Explain Indexed Allocation.
40. What is a Directory Structure?
41. What is Disk Scheduling?
42. Explain FCFS Disk Scheduling.
43. What is SSTF Scheduling?
44. Explain SCAN Algorithm.
45. Explain C-SCAN Algorithm.
46. What is Disk Fragmentation?
47. What is a Semaphore?
48. What is Mutual Exclusion?
49. What is Synchronization?
50. What are Critical Sections?

Viva Preparation Tips

Focus on Process Management, CPU Scheduling Algorithms, Deadlocks, Memory Management, File Systems, Disk Scheduling, Semaphores, and Synchronization concepts as they are frequently asked during OS lab vivas and interviews.
